

Pneumatic oscillating knife

Last Updated Friday, 30 September 2016 11:01

Pneumatic oscillating knife is powerful tool for cutting soft and harder materials in many industries. Its solid construction allows to cut hard cardboard, corrugated cardboard, gaskets, foams, rubber, leather, fabrics, etc. Usage of carbide knives ensures long lifetime of the tool

Oscillation is generated by compressed air. Range of oscillation is 8 mm and frequency 9.000 strokes per minute. This unit works exclusively with carbide knives. Knives are available with cutting length from 6 mm up to 115 mm! With this tool you can cut foam up to 100 mm.

Pneumatic oscillating knife is available for COMAGRAV DIGI, NOTUS and NOTUS PLUS.
