

COMAGRAV flatbed cutters and CNC routers with MULTI option works with several modules for cutting and creasing operations.

These modules are interchangeable and allows user to upgrade COMAGRAV machine in future.

Pneumatic oscillating knife module

POT is powerful tool suitable for cutting virtually any material. High stroke allows to cut up to 10mm PVC

- corrugated cardboard
- cardboard
- foam
- re-boards
- leather
- gaskets
- hard materials

- PVC
- rubber
- etc.

Electric oscillating knife module

EOT is suitable for cutting softer and medium density materials, as corrugated, thin cardboards, PVC, P

- corrugated cardboard
- PE
- PVC
- soft and thin materials
- leather
- thin rubber

- etc.

Motorised cutting disc module

MCD module is suitable for cutting all types of textiles and industrial fabrics. Decagonal knife rotates in h

- fabrics and textiles
- banners

Universal module for U1 tools

In this module operator inserts several tools for cutting and creasing. Tools are compact and freely inter

- Creasing wheels for corrugated (S, M, L sizes)
- Creasing wheels for cardboards (2pt, 3pt, 4pt sizes)
- Kiss-cut tool for self-adhesive vinyls, thin foils, ...
- Direct-cut tool for cutting PVC, PE, self-adhesives, ...
- V-cut tools

Modules for MULTI head
